Easy adaptable platform for any e-bike system

Security

PEDAL LOCK

ALARM SYSTEM

E-BIKE KILLSWITCH

Pedal lock

The immobilizer can resist > 200kg applied to the pedals.

Functions as an immobilizer disabling the e-bike functionalities.

Impossible to remove or replace unless authorized.

Alarm system

When theft is detected, ~105 dB alarm is activated.

The alarm continues to sound until the bike is left alone to deter thieves.

Utilizing proprietary sensor solutions, accidental detections are minimized.

E-bike killswitch

When locked, the electrical system is deactivated.

Prevents thief interacting with bike when locked.

Enabling automatic power off through bike system.*

*if supported by select controllers

Convenience

One push go!

PentaLock only requires one click of the keyfob to lock or unlock.

Also activates electrical systems, making bike ready for use.

Small, portable and easy to use - bring the PentaLock wireless key fob anywhere.

Auto-lock function

Forgot to lock bike? No worries! PentaLock locks automatically.

If wireless key hasn't been detected in close proximity for 60 seconds...

Bike will automatically lock, ensuring user doesn't have to worry.

App solution

Integrate PentaLock into your own branded app.

Utilize PentaLock's API to offer more to users.

Digital solutions for any bike OEM and cyclist.

Riding Experience

New

Digital torque

Algorithms process data in real-time and adjust accordingly

New

Adaptive Drive

Adaptive software platform that adjusts your ride for different riding scenarios.

Integrated sensor

Choose between digital torque or cadence sensor.

Hill Detection

Need a helping hand up a steep hill? No worries, we've got you covered!

Launch Assist

Stopped at a red light & you need to be ready to go when it turns green?

Gentle Ride

Perfect for maneuvering safely through city streets and at night.

WE INNOVATE
WE MANUFACTURE
WE HELP FROM A-Z

PentaLock can help bike manufacturers innovate and manufacture better bike solutions by assisting throughout the integration, including **frame**, **controller** and **mechanical** changes.

Frame integration

Frame integration prototyped from existing frame. Minor changes to aluminium frame.

Controller integration

Compatible with Bafang controller system. PentaLock CAN-bus protocol shared with third-party controller manufacturer on request.

Mechanical adaptation

We can adapt to mechanical requirements, e.g. spindle length, fat bikes, cargo, urban, etc. at higher volumes.

WATT.

Customer case

WATT Mobility from the Netherlands, uses the PentaLock system in the Brooklyn bike model. PentaLock has assisted in the integration phase with frame- and controller-manufacturer, as well as bike-assembly partner, to ensure high quality.

“

PentaLock and their team is a pleasure to work with, especially thanks to their active involvement throughout the entire integration process and the high standards they strive toward in their work.

We are very excited at Watt for the added potential that the PentaLock unit has to offer our products and ultimately our customers as well.

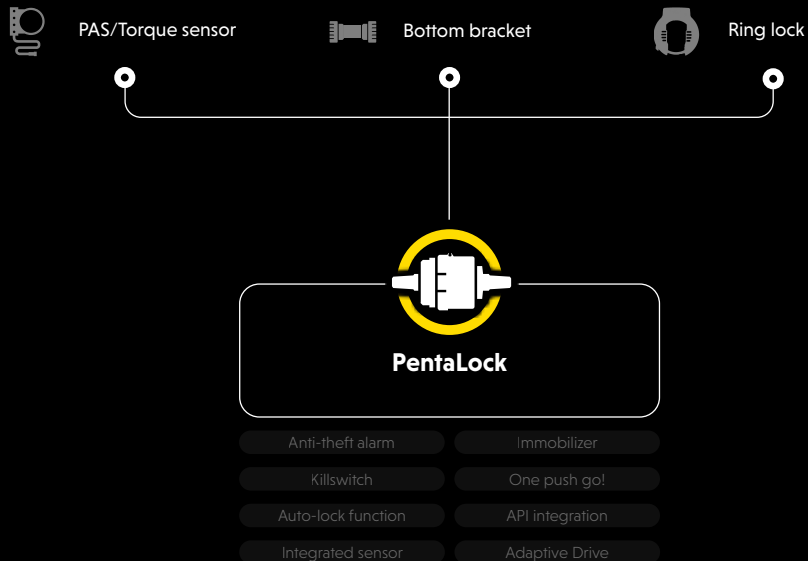

Frans Nomden
CEO Watt Mobility

Features

Lock bottom bracket in both directions	Yes
Max. load (while locked)	>370Nm ^{*1}
Backwards freewheeling	Optional
E-bike kill/disable function	Yes ^{*2}
Auto-lock function	Yes
Automatic turn off lights	Yes ^{*2}
Automatic turn off display	Yes ^{*2}
Smart Theft Alarm	Yes
Sound level	Up to 105 dBA
Power input	5-60V
Backup battery (UPS)	Integrated

^{*1} equals to >200kg of continuous load.

^{*2} for supported controllers

Electronics

Cadence sensor	32 PPR
Torque sensor	Digital torque
CAN-bus	Yes
Plug	Higo Mini F (8 pin male)
Cable length	Std. 0,4m Custom on request
IP rating	IPX5 ^{*3}

^{*3} protection against jets from all directions

Specifications

Weight approx.

460 grams

Operating temperature

-20 ° C to +60 ° C

Type of ball bearings

6003-2RS

Bearing seal

Double sided sealed (low torque type)

Crank-arm interface

Square taper

Surface of spindle

A2B (zinc plated approx. 5 µm)

Assembly tool

Custom PentaLock tool

Tested by accredited laboratory and certification body
